A Constant β_H

B Sigmoid β_H

C Vapour-pressure-dependent β_H

D Climate-driven β_H

Force of infection (week^{-1})

1897-02 1897-08 1898-02 1898-08 1899-02

Reservoir-associated spillover $\beta_R(t)$ Human-associated amplification $\beta_H(t)I(t)/N$ Total force of infection $\lambda(t)$
